A Message to Our Many Friends . . .

Sixty-six years have passed since Mr. Green founded this nursery. His idea to sell direct to the public solely through the medium of a catalog has been most successful.

This success could have been attained only as a result of the confidence you have placed in us. We, in turn, have endeavored to warrant that confidence by growing and selling nursery stock that was true-to-name, and which we have, by experience, found to be most hardy.

Mr. E. H. Burson, former Superintendent and President, and associated with us for over 50 years, passed away this summer. We mourn his passing as do the thousands of his friends throughout the country. Our close association with him for many years has more deeply instilled in us the aim of our organization since its very beginning, and that is to serve

you, perhaps hundreds of miles away, just as if you were our next door neighbor.

We want you to feel that you can depend on us to treat you fairly and squarely when you entrust your order to us. Our sixty-six years of service are proof of that endeavor.

If you have friends or neighbors who may be interested in fruit trees, shrubs, evergreens, perennials, etc., we would consider it a favor if you would speak to them of us.

To all our many patrons throughout the country and to those of you whom we are contacting for the first time, may we wish you health, happiness, and success this year of 1941.

Sincerely yours,

GREEN'S NURSERY, F. J. Sickles, President

INFORMATION TO OUR CUSTOMERS — READ CAREFULLY

To order from this catalog, simply make your selection, write it on the order blank found in this catalog and

mail to GREEN'S NURSERY, Clifton, Monroe Co., N. Y., in the self-addressed envelope enclosed herewith.

TERMS

Please send payment with order. A personal check, postal money order, express money order or bank draft is the best form of remittance. This payment-with-order saves an enormous bookkeeping expense, and we are thus able to offer you high grade trees at very low prices.

If you wish your order shipped C.O.D., kindly remit one-quarter of the total amount when order is sent to us, and balance can be paid to expressman, or mailman when delivery is made.

If your express or freight order amounts to less than \$2.50, kindly include 25c extra to cover packing and handling costs.

In order to make our prices as low as possible, we have based our packing costs on orders amounting to \$10.00 or more. It costs practically as much to pack a small order as it does a large one. THIS DOES NOT APPLY TO PARCEL POST ORDERS.

WHEN TO ORDER

It is best to order early, as this enables us to reserve for you the varieties you want and avoids the possibility of our being sold out. We ship when weather conditions are favorable in the spring. If you wish shipment made on a certain day, please make a note on your order.

WHEN TO PLANT

Planting can be done any time the trees and shrubs are dormant, and the ground is not frozen.

HOW TO PLANT

We use every effort to help make your planting a success, and have had a special booklet of planting instructions printed and one is included with every order.

OUR GUARANTEE

We guarantee all stock sold by us to be strong, vigorous and healthy, and to deliver such stock in good condition.

If you are not satisfied with your stock, or you find an error has been made in your order, we must be advised within five (5) days, and satisfactory adjustment will be made. If stock sold by us proves untrue to name, upon proper proof, we will replace the trees or refund the purchase price only.

We cannot guarantee continued growth of stock, as conditions of weather, poor planting, and acts of nature are beyond our control.

All orders are booked on that condition and that only.

The bulk of our business is crowded into a comparatively short period of time during the spring season, which means that our facilities are taxed to the utmost.

If we can induce our customers to send their orders early, it will give us more time for each individual order, and naturally the early orders will have preference over the late ones, as certain items are sold out many times before the end of the season. Your order, sent in early, will receive attention first, and stock will be reserved for you.

As an inducement for early orders, we are offering the following premiums:

CASH ORDERS amounting to \$10.00 or more received before March 10th may have choice of:

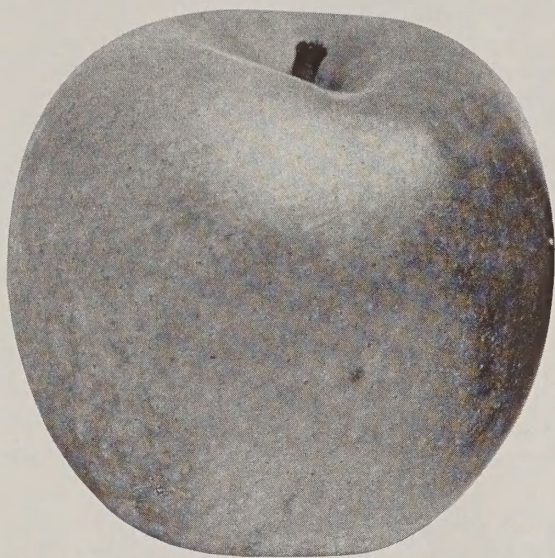

5 Flowering Shrubs (our choice), or,

3 Years' subscription to American Fruit Grower (Sample on request), or,

1 Climbing American Beauty Rose and 1 Hybrid Tea Rose (our choice)

The FREE SHRUBS will have to be shipped via express collect, inasmuch as they are too large for mailing.

RATES: Less than ten trees at each rates. Ten to fifty at 10 rates, 50 or more at hundred rates.

SUMMER APPLES

SWEETBOUGH. A large pale, greenish yellow, sweet apple of excellent quality. Should be in every home orchard. Ripens in July.

RED ASTRACHAN. Best mid-summer cooking and eating apple for home and market, yellow, splashed with deep crimson. Very good quality. Reliable cropper, very hardy, and bears fourth year. Ripens in July.

YELLOW TRANSPARENT. One of the best extra early apples, waxy-yellowish white, mild acid, juicy, and pleasant. Extremely hardy and starts bearing fourth year. Ripens in July.

AUTUMN APPLES

GRAVENSTEIN. A variety of excellent quality, unexcelled for culinary purposes by any of its kind. Skin is slightly rough and of an orange-yellow color overlaid with broken stripes of light and dark red, highly sub-acid, bears early and moderately hardy, quite productive. Ripens in mid-September.

DUCHESS. Excellent for culinary purposes and pleasant to eat out of hand when fully ripe. Skin is yellow with splashes and stripes of red. Bears about the fourth year and ripens in September.

TWENTY-OUNCE. Large, attractive, greenish-yellow with broad stripes of red. One of the most satisfactory of fall varieties for commercial planting. Ripens in September.

WINTER APPLES

BADLWIN. Large apples of bright red color with yellowish, crisp, tender flesh. Excellent quality and on account of dependability, desirable season, good size, and quality, it is one of the leading commercial varieties of New York, New England, and parts of Ohio and Michigan. Ripens in November.

DELICIOUS. Conical in shape, tapering at the base, crimson color with flesh crisp and juicy. Excellent quality and distinctive in flavor. Ideal for fancy or box trade.

NORTHERN SPY. An old time favorite and a distinct flavor that appeals to those who like a brisk, spicy apple. A leading commercial variety. Fruit is large, a bright red color, overlaid with delicate bloom. Excellent for dessert or culinary purposes. Ripens in November.

RHODE ISLAND GREENING. Unexcelled for cooking purposes and as a dessert fruit is unsur-

passed. Fine for market and good variety to grow with Baldwin as it ripens a little earlier in October.

STAYMAN'S WINESAP. Fruit medium to large in size, yellowish, striped, and splashed with dull red with firm crisp yellow flesh. Fine quality and bears in fourth year. Ripens in November. Good commercial apple.

KING. Large attractive red fruit. Regular bearer. Fruit tender, juicy, and sub-acid in flavor. Worthy of a place in any orchard. Ripens in October.

TRANSCENDENT CRAB. Fruit medium to large, skin clear bright yellow with red cheek. Flesh yellow, crisp, and juicy. Fine for jellies and culinary uses. One of the most popular of the crab apples.

WEALTHY. Fruit a very attractive red and yellow color, rated good to very good quality. An ideal filler for commercial orchards planted between rows of stronger growing varieties. A very hardy tree.

McINTOSH. Unequalled in quality and flavor by any other variety except Cortland. Fruit is of a bright red color, medium in size with white, firm, crisp flesh, fine grained, tender, and very juicy, highly sub-acid with pleasant aroma. One of the leading commercial apples of the East and commands a fancy price usually.

CORTLAND. Highest quality and flavor. Distinct flavor and appeals very strongly to apple eating public. Bears fourth year. Fruit large, white flesh, firm, crisp, and tender. Uniform and easy to handle and pack. Hardy and rapid grower. Attractive fruit commands top prices.

JONATHAN. Brilliant red color, highly flavored, excellent quality for either dessert or culinary uses. Fruit medium with crisp and tender flesh. Ripens in November.

ROME BEAUTY. Medium to large fruit, yellowish, more or less mottled with bright red. Good keeper and has established reputation in the market. Flesh firm and juicy. Ripens in November.

BELLE OF GEORGIA (White Freestone). Creamy white peach with beautiful crimson cheek. Ripens here in August.

CHAMPION (White Freestone). Considered the highest quality of all white flesh peaches. Skin white with flashes of carmine and darker red. Ripens in late August or early September.

EARLY ELBERTA (Yellow Freestone). Ripens 10 days earlier than Elberta.

ELBERTA (Yellow Freestone). The peer of all commercial peaches. Extremely hardy and very fruitful. A large golden yellow with bright red cheek. Juicy, rich, and sweet. Ideal for commercial purposes.

EARLY CRAWFORD (Yellow Freestone). Unexcelled in quality by any other variety, except Rochester, its offspring. Fruit very large, golden yellow with red blush. Ripens in late August or early September.

J. H. HALE (Yellow Freestone). Deep golden yellow, overlaid with bright carmine, unusually large and very attractive. Good commercial peach, but

not as prolific as Elberta and others. Ripens in late August or early September.

LATE CRAWFORD. Fruit large and very handsome, deep yellow, blushed and splashed with red. Ripens here the last of September.

ROCHESTER (Yellow Freestone). This is our choice of a peach for all purposes. It combines the quality of Early Crawford with productiveness of the Elberta. Fruit is good size, yellow mottled with red, juicy, rich and sweet in flavor. Unexcelled for eating out of hand and canning. Ripens here the last of August.

GOLDEN JUBILEE (Yellow Freestone). Large yellow with red cheek, of the Elberta type. A fine flavored, juicy peach—good for canning and excellent to eat out of hand.

SOUTH HAVEN (Yellow Freestone). Flesh yellow, juicy, and sweet. Good commercial peach, ripening between Rochester and Elberta. Yellow with slight blush of red.

HARDEE. The new patented peach. No doubt, it is the hardest peach known. Has been found to withstand temperature several degrees below zero without any apparent effects. Resembles Elberta in appearance. Ripens between Hale and Elberta. 7/16" caliper, 3-4 ft., at 55c each, 10 for \$5.00. This patented peach is being handled under license from patent owner.

Grapes

Two year old vines, selected for quality. Postpaid at single and ten rates only.

NOTE: We reserve the right to substitute varieties of like color, if our listed stock is sold out.

Roses have been offered to the public in so many different grades and through so many different channels, that one is more or less in a quandry as to the proper source from which to buy, and the selection of the varieties.

All of our roses are Northern, field grown and 2 yr. No. 1 budded stock. Many of the roses offered to the public are grown from cuttings, started usually in greenhouses in winter and transplanted outside in spring. They cannot compare with field grown budded stock in any way, lacking the hardiness that is so important. Beware of roses that have been out of storage for weeks. They may easily have become parched and heated, and when stacked like groceries, they seldom survive. We have made a special selection of 12 CHOICE VARIETIES, some old and some new—all are worthy of your consideration.

GREEN'S SPECIAL SELECTION (2 yr. No. 1 Large) HYBRID TEA EVERBLOOMING ROSES
